

BoxLED® Side Plus

- Maximum versatility for side lighting
- Uniform illumination by diffuse light reflection thanks to integrated optics
- Low investment and installation costs
- Short payback time compared to fluorescent lamps
- Compatible with the BoxLED® mounting profile

The BoxLED® Side Plus module chains can be used for side lighting in light boxes of almost any type and size in both indoor and outdoor applications. While the compact module dimensions are ideal for small light boxes, the high luminous flux and special viewing angle also ensure the uniform illumination of medium-sized and large light boxes. As the chains are compatible with the BoxLED® mounting profile, their installation takes very little time and effort.

Product features

- Total length of chain: 9,600 mm
- 32 modules per chain
- Adjustable module pitch from 100 to 300 mm
- High degree of protection: IP66

System recommendation: OPTOTRONIC® 24 V

- With or without integrated 1...10V dimming interface
- Available in 80 W, 120 W and 240 W (220–240 V)
- High degree of protection: IP67
